Neutralize Shock of Sound.  
If you know that you are going to  
hear a loud sound it is well to open  
the mouth, as the shock will then be  
neutralized. Noises in the ears are  
most annoying, and sometimes re-  
sist all treatment. They are often as-  
sociated with deafness and should,  
therefore, receive due attention.

LATER ON.

Chairwoman of Chamber of Com-  
merce Entertainment—Yes, we have  
secured headquarters for the Men's  
Federation of Primitive Parents at  
the Cleopatra Hotel.

"Isn't that rather far uptown?"  
"Yes, it is. But we thought the  
men would appreciate being in the  
heart of the shopping district."

BUILD UP NATIONAL FORESTS

More Than a Million Acres Have Been  
Acquired for the Purpose Since  
the Year 1910.

The lands approved for acqui-  
sition by the government for national  
forest purposes in the East since the  
beginning of the purchase policy in  
1910 are now 1,104,000 acres, hav-  
ing a purchase price of \$5,500,000.  
About two million dollars of the  
original appropriation remains avail-  
able for further purchases in the fi-  
scal year 1915. The lands favorably  
acted on to date include 133,000  
acres in the White mountains of  
New Hampshire, while 971,000 acres  
are in various parts of the southern  
Appalachians from Virginia to  
Georgia. Nearly four hundred thou-  
sand acres were approved for pur-  
chase during the last year, at an av-  
erage price of \$4.96 an acre.

As areas of suitable size are built  
up by the government through suc-  
cessive purchases they are placed un-  
der a system of organized adminis-  
tration, with local officers of the gov-  
ernment's forest service in charge.  
The first object is to protect the for-  
est against fire, for the twofold pur-  
pose of steady stream flow and in-  
creasing timber production. There  
is, however, provision for all forms  
of use of the forests not inconsistent  
with their permanent welfare as  
sources of timber and water supplies.  
Some of the areas are already begin-  
ning to yield revenue to the govern-  
ment through the sale of timber,  
which can be removed with benefit  
to the remaining stand. Eventually  
it is expected that they will prove  
excellent investments, besides yield-  
ing important public benefits.

Couldn't Be Made Public.

It was the custom of one of the  
managers to criticize every individual  
performance at each new town the  
company visited after the fall of the  
curtain on the stage. One night he  
did not say anything to young Loraine.  
He reminded the manager of his omis-  
sion by saying: "As you did not say  
anything about my performance, I  
take it it was all right." Then came  
the icy reply: "I did not say any-  
thing about your show, because what  
I have to say to you I must say in  
private."

Microbes in the Air.

Many living microbes float in the  
air of dwellings, but in houses which  
are old, overcrowded and dirty the  
numbers are very much higher. These  
come for the most part from the sides  
and floor and not from persons, but  
they are much more numerous when  
the dust is disturbed than when the  
room has been quiet for a short time.

CONTRARY CURRENTS.

"My doctor's bills are running  
up."  
"How's that?"  
"I suppose it is because I am so  
run down."

CONTRARY TACTICS.

"Now all the Irish Nationalists  
will have a round-up."  
"What then?"  
"Then they'll square off."

CRUEL HINT.

Author—This is my second at-  
tempt at fiction.  
Editor—Now I thought you  
looked like a second-story man.

THE REAL REASON.

Miss Young—I suppose you write  
to keep the wolf from the door.  
Penely—No, to keep the iceman  
from going by.

CRITICISM.

"Do you think this poem of mine  
will live?"  
"It ought to. It's the good that  
die young."

MOSQUITO NOT SOLE AGENT

Scourge of Malaria Has Been Proved  
to Exist in the Water and Soil of  
Many Countries.

At last some weight has been lift-  
ed from the shoulders of the mos-  
quito. Dr. Charles S. Braddock, Jr.,  
late chief medical inspector of the  
Royal Siamese government, says in  
a recent paper in the New York  
Medical Journal that while the mos-  
quito is the sole carrier of yellow  
fever, it is only one of the propaga-  
tors of malaria. According to Doc-  
tor Braddock, malaria is by no means  
eliminated by the annihilation of the  
anopheles pest, except in localities  
where the disease is not endemic.

In true malarial countries the  
scourge exists in the water and soil,  
as in the deep jungles of Africa,  
Asia and America, while in the foot-  
hills of the Himalayas, where the  
thermometer drops to 34.5 degrees  
Fahrenheit in the cold season, when  
there are no mosquitoes, malaria is  
so deadly that the country has be-  
come uninhabited over large areas.

To do away with malaria in the  
tropics the doctor recommends the  
simple expedient of cutting away  
the jungle for a great distance in all  
directions from the habitation, so as  
to let the sun in. This, with the  
usual precautions of protection from  
mosquitoes and the drinking of dis-  
tilled water, will prevent any epi-  
demic of malaria in Panama or in  
any other country where it exists in  
the water and soil.

SPECIAL TO WOMEN

The most economical, cleansing and  
germicidal of all antiseptics is

**Paxtine**

A soluble Antiseptic Powder to  
be dissolved in water as needed.

As a medicinal antiseptic for douches  
in treating catarrh, inflammation or  
ulceration of nose, throat, and that  
caused by feminine ills it has no equal.  
For ten years the Lydia E. Pinkham  
Medicine Co. has recommended Paxtine  
in their private correspondence with  
women, which proves its superiority.  
Women who have been cured say  
it is "worth its weight in gold." At  
druggists, 50c. large box, or by mail,
